

Rameshwaram Cruise Varanasi

Platform Showcase & Features Guide

Prepared For: Customers & Operators

Version: 1.0.0 (Production Live)

Date: July 20, 2026

1. Introduction & Overview

Welcome to the **Rameshwaram Cruise Reservation Platform**. This custom-built ticketing and booking system is designed specifically for holy Ganga cruise operators in Varanasi, offering customers a premium, hassle-free booking experience for their ghat yatra.

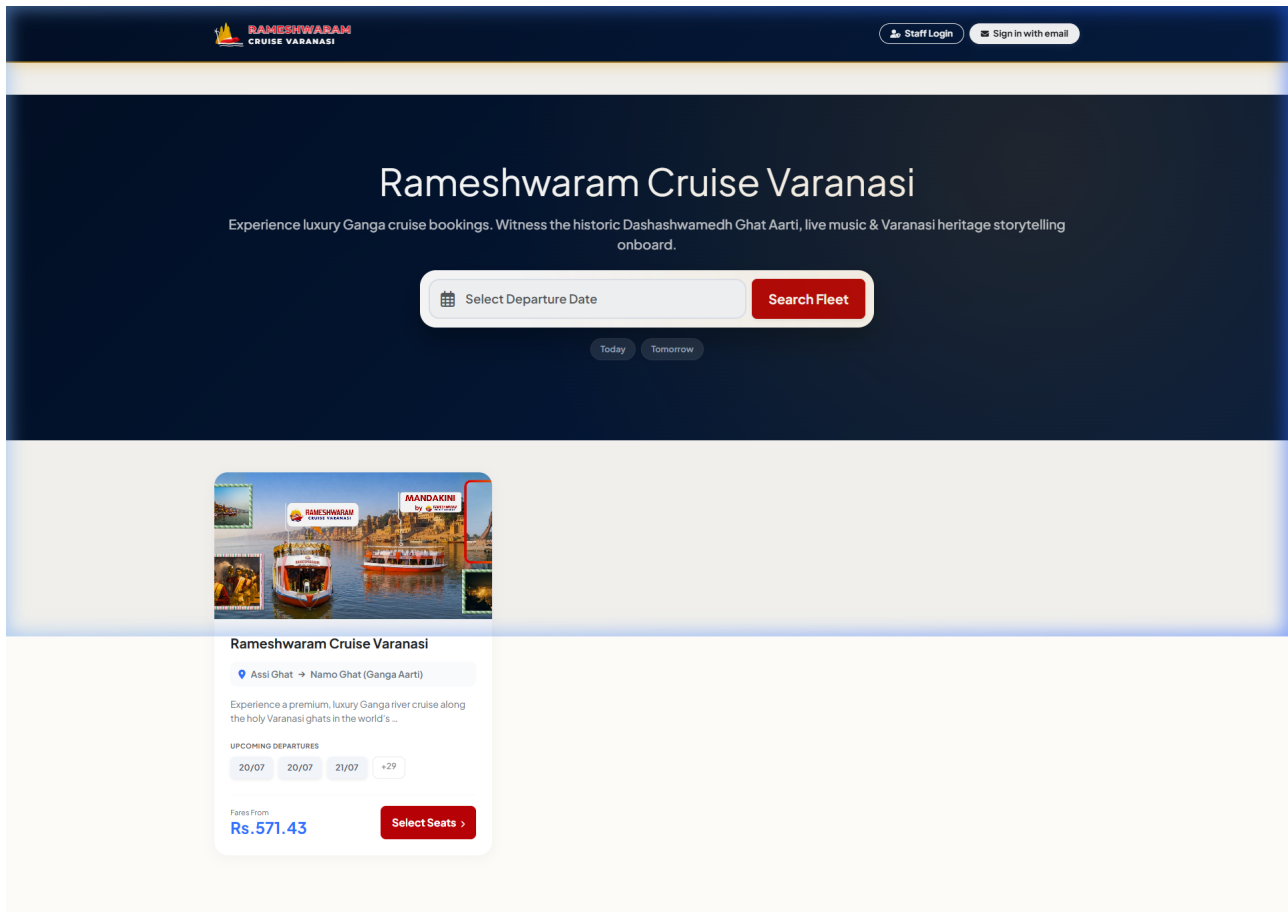

Built using modern web standards, the platform delivers state-of-the-art seat reservation mechanics, instant SMS/Email confirmation delivery, mobile gate scanners, and dynamic operational controls for cruise managers.

2. Key Platform Features

- **Dynamic Seat Reservation Map:** Real-time grid rendering (Rows R1 to R10) matching the cruise deck configuration with instant hold timers.
- **7-Minute Seat Hold Locking:** Pessimistic inventory locking prevents double-bookings or cart-hoarding.
- **Passwordless Customer Sign-in:** Secure, single-use 6-digit OTP verification codes delivered directly to emails.
- **Gate Scanning App:** Built-in scanner to validate and check-in boarding passes using device cameras at ghat gates.
- **Dynamic Surge Pricing Control:** Admins can update ticket prices in bulk or apply festival surges directly from the dashboard.

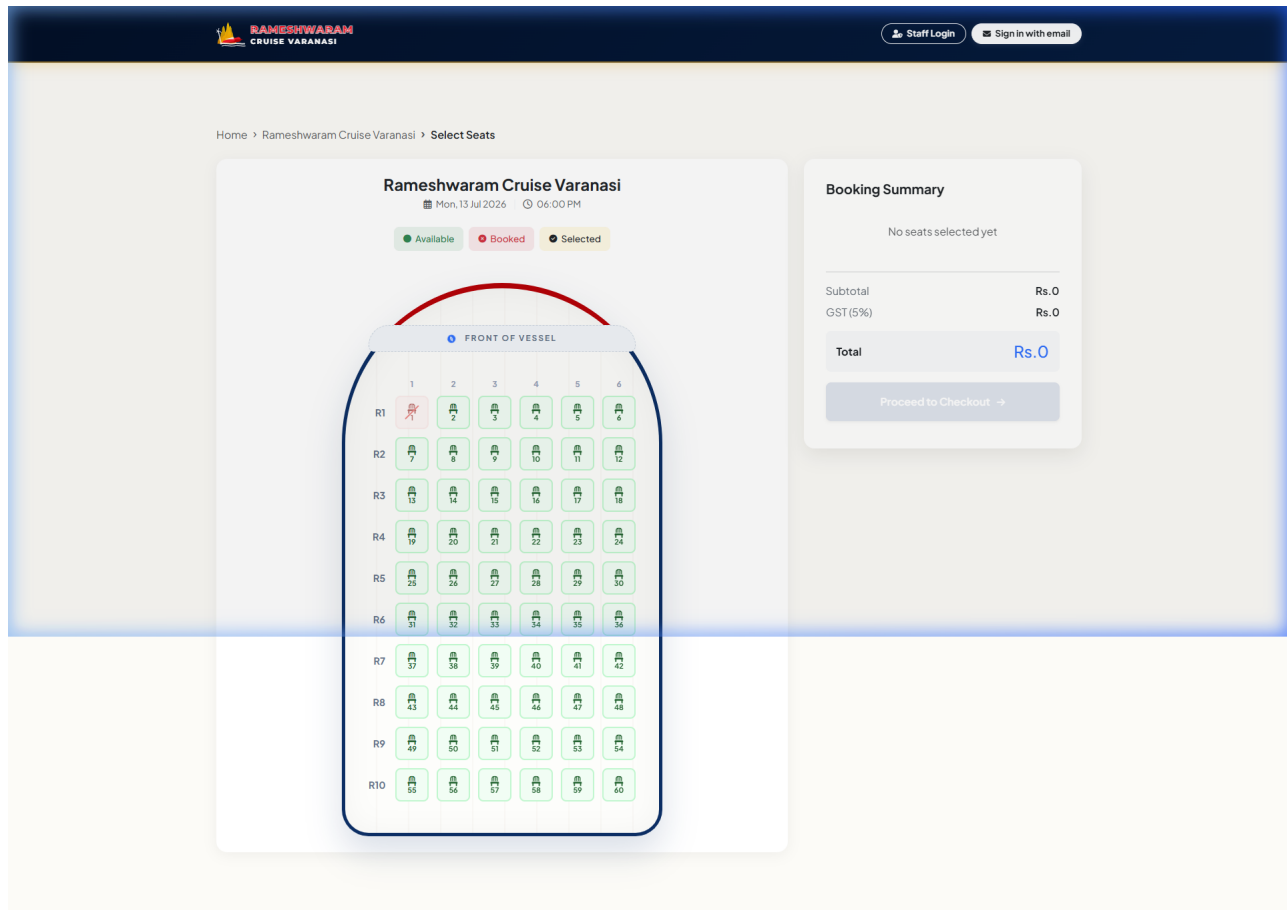

3. Customer Landing Page

The landing page greets passengers with a high-end, responsive layout featuring Varanasi temple branding, custom favicons, and SEO metadata keywords. Customers can view upcoming cruise schedules, available routes, departure slots, and start their booking in seconds.

4. Real-time Seat Selector Deck

An interactive, visual deck layout map representing rows R1 to R10. Available seats are rendered in a clean template style, while held seats are highlighted in amber and booked seats are locked. Selection is instant and triggers a ticking countdown payment clock.

5. Secure Passwordless OTP Sign-in

Features a clean email-entry page. Passengers receive a unique, one-time passcode valid for 10 minutes. The login page is hardened with rate-limiting (5 requests/min) and locking mechanisms to neutralize brute-force attacks.

No password needed. New here? Just [book a cruise](#) – we'll email your ticket.

6. Staff Authentication & Panel Access

Allows administrative staff to log in securely. Staff access is protected with 2FA email authentication challenges and robust IP rate limiters to keep the ticketing inventory, pricing records, and passenger logs secure.

The screenshot displays the Staff Login interface for Ramswaram Cruise Varanasi. The page features a dark blue header with the company logo on the left and two navigation links, 'Staff Login' and 'Sign in with email', on the right. The main content area is a light gray, and the login form is centered. The form includes a blue padlock icon, the title 'Staff Login' with the subtitle 'Admins only', and two input fields labeled 'Email' and 'Password'. The 'Email' field contains the placeholder text 'Staffemail', and the 'Password' field contains the placeholder text 'Password'. A red 'Login' button is positioned at the bottom of the form. The footer of the page is a light yellow bar containing the copyright notice '© 2026 Cruise Booking Platform. All rights reserved.'
